By Y. Daniel Liang : **Introduction to Programming with C++ plus MyProgrammingLab with Pearson eText -- Access Card Package (3rd Edition)** for courses in computer programming c how to program is a comprehensive introduction to programming in c like other texts of the deitels how to java how to program early objects 11th edition deitel how to program paul j deitel harvey deitel on amazon free shipping on qualifying offers Introduction to Programming with C++ plus MyProgrammingLab with Pearson eText -- Access Card Package (3rd Edition):

8 of 8 review helpful Great book Serious rip off By nicholas lear First let me say that I really like this C textbook a lot

and I think it is a great learning tool for my current college class in C and it would also have at least four stars from me if it did not two ABSOLUTELY UNFORGIVABLE flaws Flaw 1 This book is really a 26 chapter book but you only get 17 chapters for the money you spend and there NOTE Before purchasing check with your instructor to ensure you select the correct ISBN Several versions of Pearson's MyLab and Mastering products exist for each title and registrations are not transferable To register for and use Pearson's MyLab Mastering products you may also need a Course ID which your instructor will provide and Used books rentals and purchases made out About the Author Y Daniel Liang is currently a Yamacraw professor of software engineering in the School of Computing at Armstrong State University Savannah Georgia Dr Liang earned his Ph D in Computer Science from the University of Oklahoma
