By Richard Hightower : Python Programming with the Java¿ Class Libraries: A Tutorial for Building Web and Enterprise Applications with Jython tapestry is a powerful open source all java framework for creating leading edge web applications in java tapestry reconceptualizes web application development in developer the flagship of the developer network is the developers source for in depth programming tutorials and relevant development news across all major Python Programming with the Java¿ Class Libraries: A Tutorial for Building Web and Enterprise Applications with Jython:

2 of 4 review helpful Very nice By Christopher Lumsargis The content of this book is excellent I am a novice jython

programmer and have been playing with jython for about three years I have tried numerous tutorials and even have obtained jython books This one is the best so far It covers things I did not know existed in jython The presentation of material is logical and follows a nice gradient of complexity My only pe Python and Java are natural team mates Using Python together with the Java class libraries developers at all levels can leverage Python s simplicity and Java s power together building advanced Web and enterprise applications with remarkable speed and efficiency Richard Hightower shows how from start to finish Using step by step examples Hightower introduces the fundamentals of Python and object oriented programming You ll learn how to work with files use Python
