By Alasdair Allan, Don Coleman, Sandeep Mistry : Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones bcm2837 bcm43438 and raspberry pi 3 for raspberry pi 3 broadcom have supported us with a new soc bcm2837 this retains the same basic architecture as its the broadcom bcm2835 soc used in the first generation raspberry pi is somewhat equivalent to the chip used in first modern generation smartphones its Make: Bluetooth: Bluetooth LE Projects with Arduino, Raspberry Pi, and Smartphones:

6 of 6 review helpful Arduino projects and almost nothing about Raspberry Pi and Bluetooth By Arthur F Lange I was

very disappointed because there was only one project using the Raspberry Pi and Bluetooth. Almost all of the book's contents was about Arduino Bluetooth projects. The cover is very misleading, it should not have used Raspberry Pi on the cover and then have only a single Raspberry Pi and Bluetooth project. It This book is where your adventures with Bluetooth LE begin. You'll start your journey by getting familiar with your hardware options Arduino BLE modules computers including Raspberry Pi and mobile phones. From there you'll write code and wire circuits to connect off the shelf sensors and even go all the way to writing your own Bluetooth Services. Along the way you'll look at lightbulbs locks and Apple's iBeacon technology as well as get an understanding of how I've been looking forward to this book for a long time. I've been hounding them all the way for a print date. Tom Igoe co-creator of the Arduino.
