1 of 1 review helpful Strange illiterate winded little meat By ReindeerNinja This book is a poor poor choice for anyone wanting to learn Python scripting in an ArcGIS environment or any environment in my opinion The author uses extremely strange cases starting in Chapter 3 to make points He takes what is typically an easy case of creating string variables and turns it into an absolute nightmare He very poorly The automation of geoprocessing tasks is becoming a common practice among GIS professionals Python is the standard programming language for ArcGIS and

other fields such as remote sensing GPS spatial modeling and statistical analysis A Python Primer for ArcGIS reg combines fundamental Python programming structures to help professionals automate common geoprocessing functions Thorough explanations of programming concepts are included along with user friendly demo About the Author Nathan Jennings is experienced in GIS Remote Sensing GPS GIS for web geospatial technology consulting and business systems integration He is a full time GIS professional with the City of Sacramento he has designed and currently teaches
