Data science teams looking to turn research into useful analytics applications require not only the right tools but also

the right approach if they are to succeed. With the revised second edition of this hands on guide up and coming data scientists will learn how to use the Agile Data Science development methodology to build data applications with Python, Apache Spark, Kafka and other tools. Author Russell Jurney demonstrates how to compose a data pipeline. About the Author: Russell Jurney cut his data teeth in casino gaming, building web apps to analyze the performance of slot machines in the US and Mexico. After dabbling in entrepreneurship, interactive media and journalism, he moved to Silicon Valley to build.
