Finding patterns in massive event streams can be difficult but learning how to find them doesn't have to be. This unique hands-on guide shows you how to solve this and many other problems in large scale data processing with simple fun and elegant tools that leverage Apache Hadoop. You'll gain a practical actionable view of big data by working with real data and real problems. Perfect for beginners, this book's approach will also appeal. About the Author: Flip is the founder and CTO at Infochimps.com, a big data platform that makes acquiring, storing, and analyzing massive data streams transformatively easier.
