**By Paul Ferrill : Pro Android Python with SL4A: Writing Android Native Apps Using Python, Lua, and Beanshell** Pro Android Python with SL4A: Writing Android Native Apps Using Python, Lua, and Beanshell:

3 of 3 review helpful Helpful best available but some problems By Customer I found this book very helpful in getting

started with python on my Android SG3 As an experienced python programmer I found the Eclipse SDK more of a complicated burden than a help My final SDK included the vi and gedit editors plus ssh and sftp to place python scripts on the Android in mnt sdcard sl4a scripts Unfortunately the python to HTML Pro Android Python with SL4A is for programmers and hobbyists who want to write apps for Android devices without having to learn Java first Paul Ferrill leads you from installing the Scripting Layer for Android SL4A to nbsp writing small scripts to more complicated and interesting projects and finally to uploading and packaging your programs to an Android device Android runs scripts in many scripting languages but Python Lua and About the Author Paul Ferrill has been writing in the computer trade press for more than 20 years He got his start writing networking reviews for PC Magazine on products like LANtastic and early versions of Novell Netware Paul holds both bachelor s and master
