**By Joseph Howse : OpenCV Computer Vision with Python** this opencv and python blog is written by adrian rosebrock learn opencv python and computer vision through my opencv articles tutorials and guides opencv open source computer vision is a library of programming functions mainly aimed at real time computer vision originally developed by intel it was later OpenCV Computer Vision with Python:

2 of 2 review helpful Useful but does not include anything you won't find online By Ido Shvartsman This book covers exactly what it claims to cover an introduction to using the OpenCV library with the Python language It is not a Python book and it is not an OpenCV book as it explains neither in depth But for someone who wants to start playing around with OpenCV algorithms using Python is a good starting point as it Learn to capture videos manipulate images and track objects with Python using the OpenCV Library Overview Set up OpenCV its Python bindings and optional

Kinect drivers on Windows Mac or Ubuntu Create an application that tracks and manipulates faces Identify face regions using normal color images and depth images In Detail Computer Vision can reach consumers in various contexts via webcams c About the Author Joseph Howse Joseph Joe Howse is fanciful so to him the virtual world always seemed to reach out into reality One of his earliest memories is of watching an animated time bomb on the screen of a Tandy Color Computer The animation w
