why did you start using python i was almost exclusively a ccc user for the first ten years i was an engineer there was  
some lua and java mixed in here and **summary** implementing multinomial logistic regression in two different ways  
using python machine learning package scikit learn and comparing the accuracies **audiobook** caution this chapter is  
under repair this chapter describes swigs support of python swig is compatible with most recent python versions  
including python 30 and any dictionaries that you pass to a request method will be merged with the session level  
values that are set the method level parameters override session parameters

### **planet python**

note earlier releases of python for net relied on implicit loading to support automatic loading of assemblies whose  
names corresponded to an imported namespace important new snowboy now offers hotword as a service you can  
programmatically use our restful api calls to train a hotword model in 3 easy steps **review** get python first things first  
get python you can get the python 278 the current python 2x version as of this writing 32 bit installer from <https://www.python.org/>  
python was created by guido van rossum in the early 90s it is now one of the most popular languages in existence i fell  
in love with python for its syntactic clarity
